

March 17, 2011

To all Mechanical Products (MP) Valued Customers:

I am sure that you, like the rest of the world, have been saddened by the terrible events that have taken place in Japan in recent days and all of our condolences are very much with the Japanese people at this time.

This correspondence addresses any questions related to impacts to our operations or supply chain. MP has no major production facility in Japan. At this time and from our review and knowledge of our supply chain, there are no known disruptions to any of our production outputs. MP will continue to evaluate the impact, if any, of raw materials and/or component supply. We are monitoring the situation very closely with our supply chain partners and will provide updates if any are required.

Thank you for your support of MP.

Regards,

Ronald Prokup
General Manager
